## WORK

April 2015 - March 2017

### Lead Designer

Adclouds

A platform for managing and improving people's online marketing. My responsibilities revolved mostly around work in the early stages of development. Generating ideas to increase the user experience and prototyping these ideas. Iterating over the prototypes until a good solution was found and then implementing the HTML and CSS. I also worked with the code where we used the AngularJS framework to build our application.

## SKILLS

HTML

CSS

JavaScript

JQuery

Meteor

AngularJS

## PROJECTS AND NOTABLE FEATS

### Website

Gleeson Design

Created a portfolio website for a furniture designer and interior architect. Lots of discussions together with the client in order to make a great website that fit the requirements of style and design.

### Website

Gbg Startup Hack

As a part of the group that arranged 2015 years Gothenburg Startup Hack, where we arranged a hackathon on a boat in Gothenburgs archipelago, I was responsible for the website.

## EDUCATION

August 2010 - June 2011

### Engineering Preparatory Year

Chalmers

January 2015 - April 2015

### Web Developer

Enfo

Designed and implemented the concept "nyttigaappar" together with a colleague. Created logo and then website for the concept. We then moved on to design and implement a demo application. The demo was developed as a responsive webapp and was intended to function as a base for further iOS and Android development.

Java

Git

Sketch

Illustrator

Photoshop

### Android Application

Clicker

An easy-to-use clicker application for dog training. Getting rid of everything irrelevant and focusing on doing one thing and doing it well. Smaller project just to learn to get things shipped.

### Voluntary Work

Computer Education in South Africa

Shipped, educated students and installed computers to schools in South Africa in order to give the students a chance to further educate themselves. Worked together with Star for Life in Hluhluwe.

August 2011 - June 2015

### Software Engineering

Chalmers
